Foreword

The information published in this Register has been obtained from sources believed to be reliable, but the Society is unable to guarantee the accuracy of all details.

All yachts at present classed by Lloyd's Register of Shipping are listed in the Register together with those yachts where class has been recently withdrawn or where class is currently being contemplated.

July 2000

1

LR number

A unique seven digit identification number printed in **bold type** which is used for data processing purposes. Now recognised by the International Maritime Organisation (IMO).

Call sign

Signal letters or radio call sign assigned by the relevant national authority.

Official No.

The identification number assigned by the national authority.

Navigational aids and Communication facilities

CollRdr	Collision Radar
Df	Direction finder
Esd	Echo sounding device
Gc	Gyro-compass
Pfd	Position fixing device
Rdr	Radar
RT	Radio-Telephone
RTm	Radio-Telephone (medium frequency)
RTh	Radio-Telephone (high frequency)
RTv	Radio-Telephone (very high frequency)
SatNav	Satellite Navigation
SatCom	Satellite Communication

2

Former names

The figures following the former name of a yacht indicate the year in which the change of name occurred. Former names are retained in the Register throughout the life of the yacht, and an index to these names is included in the Register of Classed Yachts Subsidiary Sections.

Owners

The registered owners are recorded in **bold type**. The underlined letter in each owner's name indicates the letter under which the entry appears in the List of Yachtowners.

Managers

The managers of the yachts are recorded if desired. The underlined letter in each manager's name indicates the letter under which the entry appears in the List of Yachtowners.

Port of Registry

A port printed in *italic type* is the home port of a yacht and is shown where there is no port of registry. An entry printed in parentheses indicates the last known port of registry.

Flag

Indicates flag registry under which the yacht normally operates. An entry printed in parentheses indicates the last known flag.

Satellite Communication Identity No.

The identification number and answerback assigned by the appropriate authority.

Former LR Identity No.

The six figure number prefixed by the letter Y, formerly used in the Register of Classed Yachts up to 1994.

3 (TONS)

Gross tonnage

The Gross Tonnage printed in **bold type** indicates that the yacht has been measured in accordance with the requirements of the International Convention on Tonnage Measurement of Ships 1969. This tonnage is derived by calculating the total enclosed volume of the yacht and using this capacity in the formula specified within the Convention.

The Gross Tonnage printed in *italic type* indicates that the yacht has been measured in accordance with the tonnage regulations adopted prior to the coming into force of the International Convention on Tonnage Measurement of Ships 1969 on 18th July 1982. This Gross Tonnage is broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for stores, fuel, passengers and crew, with certain exceptions, divided by 100. Thus 100 cubic feet of capacity is equivalent to 1 gross ton.

Net tonnage

The Net Tonnage printed in normal type when derived in accordance with the International Convention on Tonnage Measurement of Ships 1969 is a function of the Gross Tonnage.

The Net Tonnage is derived from the corresponding Gross Tonnage printed in *italic type* by deducting spaces used for the accommodation of the master, crew, navigation, and propelling machinery (if deductible).

Displacement

The weight in tonnes (1000 kg) of the yacht when loaded to her maximum draught.

4 (CLASSIFICATION)

Classification symbols of Lloyd's Register of Shipping Hull and equipment

⚡	This distinguishing mark denotes that the yacht was constructed under the Society's Special Survey in compliance with the Society's Rules.
100	Character figure assigned to yachts considered suitable for sea-going service.
A	This character letter will be assigned to all yachts, with the exception of yachts designed and intended for racing under the Rules of the International Yacht Racing Union, which have been built or accepted into class in accordance with the Society's Rules and Regulations and which are maintained in good and efficient condition.
R	This character letter will be assigned to yachts designed and intended for racing under the Rules of the International Yacht Racing Union for the International Rating Classes (for 5.5 m, 6.0 m and 12.0 m rating) and built in accordance with the <i>Rules for the Construction and Classification of Yachts of the International Rating Classes</i> , and the Society's requirements for this class.
1	The character figure is assigned to: (a) Yachts having on board, in good and efficient condition, anchoring and/or mooring equipment in accordance with the Rules.
—	This character symbol, in the position usually occupied by the figure 1 , is assigned to yachts when the anchoring and mooring equipment is not in accordance with the requirements of the Rules but is considered to be acceptable.

Special surveys

SS-with date	Special Survey. A record of any later Special Survey will be published in the monthly Supplement to the Register of Ships.
M-with date	Modified Special Survey, indicating that the yacht has been surveyed for the appropriate Special Survey but repairs effected only for a limited period. The period for which the class is maintained follows the date.
CS-with date	Continuous Survey of the hull.
Records of all periodical surveys will be found in the Classification Survey Dates Supplement to the Register of Ships.	

Machinery

⚡LMC	Notation assigned when the propelling and essential auxiliary machinery has been constructed, installed and tested under the Society's Special Survey and in accordance with the Society's Rules.
*LMC	This notation will be assigned to yachts when the propelling and essential auxiliary machinery is of an approved standard type and where each main engine does not exceed 500 kW (680 shp) and has not been constructed under survey at the maker's works, but has been installed and tested under the Society's Special Survey in accordance with the Society's Rules and Regulations.
—LMC	Notation assigned when the propelling and essential auxiliary machinery has been constructed under the survey of a recognized authority in accordance with Rules and Regulations equivalent to those of the Society and, in addition, the whole of the machinery has been installed and tested under the Society's Special Survey in accordance with the Society's Rules.
LMC	This notation is assigned to machinery of yachts submitted for classification, which although not built nor installed under supervision, is found or placed in accordance with Lloyd's Register's Rule requirements for machinery at a Special Survey for Classification, or in those cases where the propelling and essential auxiliary machinery can be deemed to be existing by virtue of having been procured without Lloyd's Register's Special Survey but where the machinery has been installed and tested under survey and found to be acceptable to Lloyd's Register.

UMS

This notation may be assigned to a yacht which can be operated with the machinery spaces unattended and where the control engineering equipment has been arranged, installed and tested in accordance with the Society's Rules.

(UMS)

When the **UMS** notation is shown in parenthesis, this indicates that approval of the control engineering equipment has been temporarily suspended.

Equipment Letter (EL)

A A† B*, etc.

Equipment Letters determined by the Society's Rules for Ships. These are followed by either the diameter and grade of chain cable on the yacht or the length and diameter of the chain cable in metres and millimetres respectively and grade of chain cable.

U1 U2 U3 U4

Grades of chain cable, other than wrought iron or mild steel fire-welded, as defined in the Society's Rules.

Withdrawal of Class

'LR class withdrawn—Owners request' indicates that when the Owners requested withdrawal of class from the Register Book, the rule requirements had up to that time been complied with.

'LR class withdrawn' indicates that at the time of withdrawal of class from the Register Book, the rule requirements had not been complied with.

'LR class withdrawn—Reported defects' indicates that owing to reported defects, the yacht was not entitled to retain her class in the Register Book.

Classification with other Societies

If a yacht is classed with another Society, the initial letters of the Society are recorded as shown below. Where these letters are shown in parentheses indicates that the yacht was previously classed with that Society.

AB	American Bureau of Shipping
BV	Bureau Veritas
GL	Germanischer Lloyd AG
NK	Nippon Kaiji Kyokai
NV	Det Norske Veritas Classification A/S
RI	Registro Italiano Navale

5

(HULL)

Following the conversion of imperial to SI units in the 1987 Register, it is possible that measurements in metres can be inaccurate by up to 30 millimetres.

Date of build

For yachts built under the supervision of Lloyd's Register surveyors, the date of build, specified by the year and month, shall be the date at which the new construction survey process is completed. The date of commissioning may be specified in case of substantial delay between completion of construction and the yacht commencing active service.

For yachts built under the supervision of other classification societies, the date of build shall be the year as shown in their respective Registers. For other yachts, the reported year of completion of construction is shown.

In all instances where there has been a significant interval between the launching and the completion or commissioning of the yacht, two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Recmd. means recommissioned.

Yachtbuilders and place of build

This normally records the yard where the hull of the yacht was built. When it is known that major sections of the hull have been constructed by other builders, their names are also recorded, but the entry of a single builder's name in no way implies that all of the hull has been fabricated in that yard.

The underlined letter indicates the letter under which the yachtbuilder appears in the List of Yachtbuilders.

Yard number

The builder's number(s) is shown for the hull section(s).

Overall length

The distance measured parallel to the static load waterline from the fore side of the stem to the after side of the stern or transom, excluding rubbing strakes and other projections.

Bulbous bow (BB): When the overall length is followed by the notation (BB) this indicates that the yacht has a bulbous bow and the overall length recorded includes any protrusion of that bow.

Length W.L. (waterline)

The distance measured on the static load waterline from the fore side of the stem to the after side of the stern or transom.

Extreme Breadth

The extreme breadth is the maximum breadth to the outside of the yacht's structure excluding rubbing strakes or other projections.

Moulded breadth

The moulded breadth is the greatest breadth at amidships from heel of frame to heel of frame.

Maximum draught

The maximum draught to bottom of keel.

Depth

The depth is the vertical distance at amidships from the bottom of keel to the top of the upper deck at side.

Alterations

alt	altered
conv	converted/adapted (from)
len	lengthened
ND	New Deck
pt	part

6

(YACHT TYPE)

Description of yacht

Unless otherwise stated, yachts are of steel construction. Where higher tensile steel is extensively used in the main hull structure of a yacht, a suitable note is inserted below the description of the yacht.

The description of the yacht given in this column is not a Lloyd's Register classification notation. The information published in **bold type** on the first line indicates the basic type of the yacht including hull material other than steel. The second and subsequent lines define the rig of sailing yachts, the name of the designer and the class or standard type of yacht including IYRU International Rating Class.

Aux	Auxiliary propulsion machinery
D-E	Diesel-Electric
GT	Gas Turbine
M	Motoryacht
Q	Quadruple screw
T	Twin screw
Tr	Triple screw
Comp	Composite construction

7

(MACHINERY)

Engines

a.c.	alternating current
Cy	Cylinders. The preceding figures indicate the number of cylinders and those which follow are the cylinder diameter and length of stroke.
d.c.	direct current
dr	double reduction (gearing)
E	Engine(s) (refitted indicates that the engine(s) now fitted has been used previously either in the same or in another yacht).
elec.	electric
Emy.	Emergency
gen.	generator(s)
kW	kilowatts
M.E.	Main Engine(s)
NE	New Engine(s). (The ∇ indicates that the engine(s) fitted at the date recorded were built under the supervision of the surveyors to the Rules of Lloyd's Register.
SA	Single Acting. The number prefixed indicates the stroke cycle.
sc.	screw
sr	single reduction (gearing)
V	volt

Power

For engines classed in accordance with Lloyd's Register Rules, the power recorded is the total maximum designed shaft power approved.

In diesel-electric machinery, the total shaft power of the oil engines is recorded, together with the rated power output and voltage of each electric generator and each electric motor.

bhp	brake horsepower (oil engines)
kW	kilowatts
shp	shaft horsepower (turbines and electric motors)

Design

The engine design is recorded together with the designation of makers type where known.

Auxiliary electrical generating plant

The number of generators is given, followed by the rated power output and voltage, d.c. or a.c., of each generator and, in an a.c. installation, the frequency in hertz (Hz). These are listed in descending order of rated power output. Emergency sources of power and sets used solely for harbour purposes are not recorded.

Fuel bunkers

The capacity of the bunkers is recorded in tonnes (t).

The oil fuel capacity is the capacity of all spaces, including double bottom spaces, which are permanently fitted for the carriage of oil fuel and which have permanent provision for its use on board.

The capacity of settling tanks is included.

Special propellers

Special type propellers are recorded, i.e. directional, controllable pitch and athwartship thrust propellers. Stern jet pumps are published when known.

Speed in knots

The speed recorded is that which the yacht is stated to be capable of maintaining at sea in normal weather and at normal service draught.

Boilers

All pressure values are shown in bar, as well as the equivalent pressure in kilogram-force per square centimetre or pound-force per square inch in parentheses. When details of boilers are recorded in parentheses thus: (AuxB 6,9 bar) (7 kgf/cm²) this indicates that the boiler is temporarily out of use.

db domestic boiler(s) supplying steam exclusively for non-essential services, i.e. for purposes not connected in any way with the operation of the yacht at sea. Only recorded when working pressure and heating surface exceed 3,4 bar (3,5 kgf/cm²) and 4,7 square metres respectively.

hs heating surface. The figure recorded is the total evaporation surface of boilers in square metres plus the total surface of superheaters plus half the surface of economisers and is used for calculating the fees for periodical surveys of water tube boilers. Where the figures are recorded in parentheses they may represent only the heating surface of the boilers.

HWH Hot Water Heater

bar 1 bar = 1,02kgf/cm² = 14,5lb/in²

kgf/cm² kilogram-force per square centimetre

lbf/in² pound-force per square inch

YACHTOWNERS AND MANAGERS

KEY TO LIST OF YACHTOWNERS

This list reflects the ownership as shown in the Register of Classed Yachts. Where a manager is also recorded for a yacht in the Register then the entry in the List of Yachtowners will be found under the manager's name with the owner's name as a sub-heading in brackets. In such cases a cross-reference from owners to managers is also included.

The short name printed in capital letters on the first line of each entry is intended to facilitate quick reference and is an abbreviated version of the owner's or manager's name. The number in brackets on the first line is the owners or manager's unique code number.

This is followed by the full name-style, postal address, telephone number, telefax number, telex number and cable address.

Each yacht is preceded by the two letter abbreviation 'yt'. The year of build and the gross tonnage are also shown.

LIST OF YACHTOWNERS 2000-01
